

Features

- Zero 'U' 4 or 5 compartment chassis
- RCBO protection
- Digital amp meter optional
- 3-metre 4mm 32A lead or 16A C20 input
- 16A input offers choice of input plug types
- Choice of 11 power module types

Technical Information

The Modular PDU Series gives the Installer and End User alike complete freedom to place the correct power sockets in a cabinet in the correct position every time.

Using a vertical Zero 'U' body with inputs of anything up to 16A and 32A, all with RCBO protection and a digital amp / volt meter optional.

Two Chassis sizes of 4 or 5 compartment which fit comfortably in a 42U cabinet, give the flexibility of placing the power modules nearest the correct equipment, there are 11 different modules to choose, various versions of UK, C13, C19, Overseas and individually fused.

The Chassis is complete with bus bar backplane that feeds the first to last socket all the time so that any module can be hot swapped anywhere in the chassis without powering down the PDU, the modules only become live when fully inserted, and can be removed only when the locking mechanism is pressed. We also offer a blanking module to fill unit completely keeping aesthetics tidy. Overall cost of the Modular PDU will always be in the control of the specifier.

Product Codes

Part Number	Description
M4C32AC32ADA	4 Compartment Modular PDU, with Digital Amp/Volt Meter, RCBO - 32A Com - BK
M4C32AC32A	4 Compartment Modular PDU, RCBO - 32A Com - BK
M4C16AC20DA	4 Compartment Modular PDU, with Digital Amp/Volt Meter, RCBO - 16A input - BK
M4C16AC20	4 Compartment Modular PDU, RCBO - 16A input - BK
M5C32AC32ADA	5 Compartment Modular PDU, with Digital Amp/Volt Meter, RCBO - 32A Com - BK
M5C32AC32A	5 Compartment Modular PDU, RCBO - 32A Com - BK
M5C16AC20DA	5 Compartment Modular PDU, with Digital Amp/Volt Meter, RCBO - 16A input - BK
M5C16AC20	5 Compartment Modular PDU, RCBO - 16A input - BK
